

A restricted freedom of choice: Linguistic diversity in the digital landscape

Trond Trosterud

30 мая 2011 г.

Today's topic:

Philosophy, the freedom of will

Bottom line:

Our freedom is restricted in many ways.

If we overlook these restrictions, we will not be able to understand linguistic behaviour

Today's topic: The upper third

Languages, ordered according to numbers of speakers

In practice, there still are obstacles

Obstacle: The Norwegian census registry (Folkeregisteret)

- ▶ Allows a-z and æøå and äéèôöü
- ▶ but not the Sámi letters á or čđŋšž
- ▶ Transition period 1.1.2011 - 1.1.2020 (!!!)
 - ▶ Ánde, Behkká, Inggá, Máret are thus illegal names
 - ▶ 63% of the Sámi first names in our base contain á (9.2% contain other Sámi letters)
- ▶ The lesson learned: Sámi has no status

Freedom of choice?

└ Written language

└ Read

Obstacle: The Norwegian company registry (Brønnøysundregistra):

- ▶ Allows Latin 1 (also á), but not the other Sámi letters
 - ▶ The newspaper Ávvir can be registered, but Šillju Gatekjøkken & Café Karasjok cannot

There are also languages with real difficulties: Yoruba

- ▶ 20 million speakers
- ▶ Official status
- ▶ No official support on any OS, but Linux work in progress
- ▶ Now, there is a discussion on skipping the diacritics

á, à, é, è, ẹ, ẹ́, ẹ̀, í, ì, ó, ò, ọ, ọ́, ọ̀, ẹ́, ú, ù

á, à, é, è, ẹ, ẹ́, ẹ̀, í, ì, ó, ò, ọ, ọ́, ọ̀, ẹ́, ú, ù

South-West Africa: Click letters

Uni	Hex	Aux	Hex	Btu	Click type
⊙	x0298	∅	x00D8		bilabial
	x01C0		x007C	c	dental
	x01C1			x	lateral
‡	x01C2	+	x002B		alveolar
!	x01C3	!	x0021	q	retroflex

Should one use the click letters?

- ▶ Arguments for these click letters
 - ▶ They are already in use (conservativity)
 - ▶ They differ from other letters (as the clicks differ from other sounds)
- ▶ Arguments against these click letters
 - ▶ Problem: They look like punctuation marks
 - confusion, people use the punctuation marks instead

Freedom of choice?

Sámi Localisation – a success story

- ▶ North Sámi keyboard layout is now included, out of the box, no matter where you buy your computer,
- ▶ from Linux KDE 3.0, Mac OS 10.3, Win XP SP2 onwards

Freedom of choice?

└ Written language

└ Write

Sámi Localisation – a success story

- ▶ a decade of hard work, involving experts and language users
- ▶ consensus-seeking conferences among users
- ▶ standardisation (ISO, CEN, national standards)
- ▶ pressure from our state administrations upon the OS vendors
- ▶ the open source movement

What we did for Sámi

- ▶ Already many keyboard layouts available
 1. We compared them to each other
 2. Letters that had the same positions in all former keyboards kept their positions
- ▶ The layouts in different countries were based on different keyboards
 1. We made one Sámi keyboard for each country
 2. @, §, ', etc. were placed as in the national keyboards
 3. ... but the letters were kept in the same positions

Placement of Sámi letters varied on existing keyboards

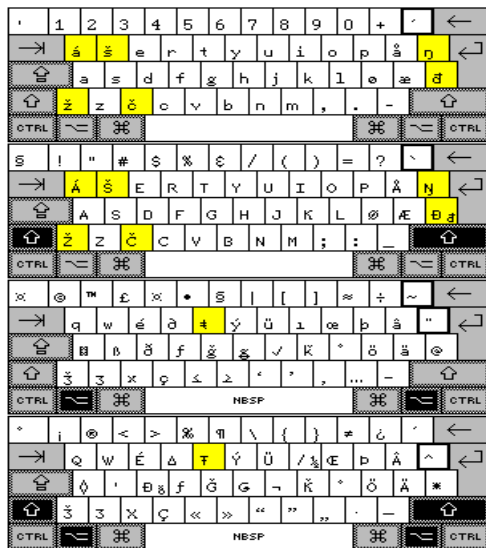

- ▶ which keys to use for Sámi letters?
 - ▶ Strategy: Keep both maj lg letters and Sámi, and sacrifice non-Nordic q, w, x
- ▶ How to place the Sámi letters?
 - ▶ According to text frequency
 - ▶ The most common letters were given more prominent positions.
- ▶ Where to place the replaced letters?
 - ▶ As a rule, we put the replaced letters one level up.
 - ▶ So, when the key *w* gives *š*, then, in order to get *w*, you press option-*w*, etc..

Revidert nasjonalbudsjett 2011

Finansminister Sigbjørn Johnsen la frem Regjeringens forslag til Revidert nasjonalbudsjett 2011 fredag 13. mai.

Du kan se pressekonferansen på [nett-TV](#).

Du finner mer informasjon om budsjettet på [Finansdepartementets budsjettportal](#).

Helse- og omsorgsministeren har igangsatt et arbeid med å måle kvalitet av behandling ved norske sykehus. – Jeg mener at det er viktig at pasientene har informasjon om sitt sykehus, og at sykehusene kan bruke dette i sitt forbedringsarbeid, sier Anne-Grete Strøm-Erichsen.

Kvalitetsmål skal gi bedre behandling

(Helse- og omsorgsdepartementet, 20.05.2011)

NYHETER

De første prioriterte artene er på plass

Regjeringen har i dag vedtatt de første prioriterte artene etter naturmangfoldloven. Prioriterte arter er et av de nye, sentrale virkemidlene i naturmangfoldloven. Det skal bidra til at artene og deres genetiske mangfold ivaretas på lang sikt og at artene

Revidert nasjonalbudsjett 2011

Finansminister Sigbjørn Johnsen la frem Regjeringens forslag til Revidert nasjonalbudsjett 2011 fredag 13. mai.

Du kan se pressekonferansen på [nett-TV](#).

Du finner mer informasjon om budsjettet på [Finansdepartementets budsjettportal](#).

Helse- og omsorgsministeren har igangsatt et arbeid med å måle kvalitet av behandling ved norske sykehus. – Jeg mener at det er viktig at pasientene har informasjon om sitt sykehus, og at sykehusene kan bruke dette i sitt forbedringsarbeid, sier Anne-Grete Strøm-Erichsen.

Kvalitetsmål skal gi bedre behandling

(Helse- og omsorgsdepartementet, 20.05.2011)

NYHEITER

De første prioriterte artene er på plass
Regjeringen har i dag vedtatt de første prioriterte artene etter naturmangfoldloven. Prioriterte arter er et av de nye, sentrale virkemidlene i naturmangfoldloven. Det skal bidra til at artene og deres genetiske mangfold ivaretas på lang sikt og at artene

Information from the Government and the Ministries

The Millennium Development Goals

In 2000 The eight Millennium Development Goals (MDGs) were agreed to by all the world's countries and leading development institutions.

Norwegian Prime Minister Stoltenberg has made the decision to contribute in a special way to actually achieving the MDG No. 4 and 5 on reducing child mortality and improve maternal health by 2015.

Bill Gates, Co-chair of the Bill & Melinda Gates Foundation, and Norwegian Prime Minister Jens Stoltenberg met in Oslo 16 May. The topic for the meeting was how to further scale up the efforts to immunize children in poor countries.

Stepping up efforts for immunization of children in poor countries

(Office of the Prime Minister, 16.05.2011)

NEWS

Norway aligns itself with EU sanctions against Syria
Norway has decided to align itself with the EU's sanctions against Syria. "Norway supports international efforts to bring an end to the unacceptable use of violence against the Syrian people," commented Foreign Minister Jonas Gahr Støre.

Gurutbellodaga Marie Fangel áigu bivdit Romssa ovdagotti geassádit olles ohcanproseassas searvat sámi giellahálddašanguvlui maŋemus áiggiid rieja geažil mediain. Dát hirmástuhtá Ruksesbellodaga mii oaivvilda Gurutbellodaga leat "borjjasteame behtolaš leavggain".

Romssa suohkanstivraáirras Gurutbellodaga ovdas, Marie Fangel, lohká iTromsø aviisii ahte digaštallan ja nággu šilttaid birra sámi báikenamaiguin maŋemus áiggiid, lea šaddan váivves áššin mii lea dagahan

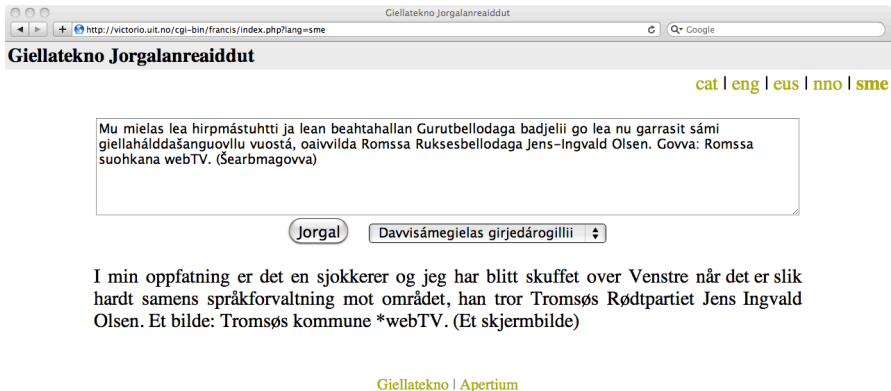

Jorgal Davvisámegielas girjedárogillii

Venstre Marie *Fangel skal be Tromsøs formannskap trekke seg på den hele søknadsprosessen vi slutter oss sammen samens språkforvaltning til området sist tider på grunn av skrålet på mediene. Denne sjokkerer Rødtpartiet som tror at Venstre skulle være "det seile på de upålitelige flaggene". Tromsøs kommunestyrerepresentant for Venstre, Marie *Fangel, sier *ITromsø til avisen at debatten og krangelen *šilttaid om med samens stedsnavn sist tider, det har blitt som trasig sak som har latt forårsake motsetninger samene og nordmennene mellom. Derfor skal han samle motsetningen og foreslå formannskapmøtet mandagen at de stanser søknadsprosessen å slutte seg sammen samens språkforvaltning til området. Ovdal som å tvile *Fangel leste på Tromsøs kommunestyremøte allerede før julene at han tviler det lønner seg når til Tromsø leter samens språkforvaltning til området. – Dette kommer å la forårsake problem og tretter. Vi synes i gang med å lage problemet da vi sier at samisk skal styrkes mye enn annen

Note: Grammar-based lg tech is not the dominating approach

- ▶ Two flavours of language technology
- ▶ Grammatical (*symbolic*) approach
 - ▶ Good results for some grammatical frameworks
 - ▶ ... not so good for others
 - ▶ Much lg-specific work
 - ▶ Demands a good grammar, dictionary, and a modest text corpus (1+ mill)
 - ▶ Statistical (*stochastic*) approach
 - ▶ Good results for lgs with small morphologies
 - ▶ Marginal lg-specific work
 - ▶ Demands huge text corpora (100+ mill)
- ▶ The last decade and a half, the latter has dominated

The languages of Google Translate

- ▶ Western European
 - ▶ Basque, Catalan, Danish, Dutch, English, Estonian, Finnish, French, Galician, German, Icelandic, Irish, Italian, Latin, Maltese, Norwegian, Portuguese, Spanish, Swedish, Welsh, Yiddish
- ▶ Eastern European
 - ▶ Albanian, Belarussian, Bulgarian, Croatian(-), Czech, Georgian, Greek, Hungarian, Latvian, Lithuanian, Macedonian, Polish, Romanian, Russian, Serbian, Slovak, Slovene, Ukranian

Freedom of choice?

└ Language technology

└ Machine translation and multilingualism

Bridging the gap: Language technology for minority languages

- ▶ More basic tools become open source
 - ▶ Helsinki finite transducer, Odense disambiguator, ...
 - ▶ Publically funded lexica become accessible (Finland, Norway, ...)

Freedom of choice?

└ Language technology

└ Machine translation and multilingualism

Bridging the gap: Language technology for minority languages

- ▶ More basic tools become open source
 - ▶ Helsinki finite transducer, Odense disambiguator, ...
 - ▶ Publically funded lexica become accessible (Finland, Norway, ...)
- ▶ Lg tech might be run as academic projects for vanishing languages

Bridging the gap: Language technology for minority languages

- ▶ More basic tools become open source
 - ▶ Helsinki finite transducer, Odense disambiguator, ...
 - ▶ Publically funded lexica become accessible (Finland, Norway, ...)
- ▶ Lg tech might be run as academic projects for vanishing languages
 - ▶ For linguistics, languages with few speakers are as interesting as languages with many speakers

Bridging the gap: Language technology for minority languages

- ▶ More basic tools become open source
 - ▶ Helsinki finite transducer, Odense disambiguator, ...
 - ▶ Publically funded lexica become accessible (Finland, Norway, ...)
- ▶ Lg tech might be run as academic projects for vanishing languages
 - ▶ For linguistics, languages with few speakers are as interesting as languages with many speakers
 - ▶ Even more so: Languages where you may be a pioneer may be more attractive

Language technology as language documentation

- ▶ When languages are about to vanish, we want documentation
- ▶ It is not obvious that we should make transducers etc.
- ▶ but...
 - ▶ lexicographical work should be conducted in a structured way
 - ▶ if corpora are available, they could be annotated by a parser
 - ▶ a transducer may check the validity of the rules of the reference grammar
- ▶ ... so the researcher and the language community have common interests

Freedom of choice?

└ Language technology

└ A new paradigm for linguistic work

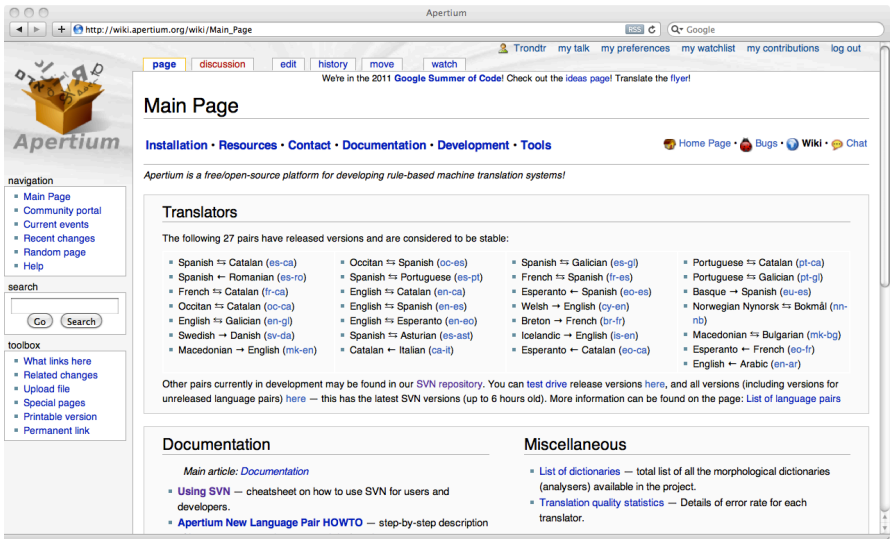

A new paradigm for linguistic work

- ▶ New way of doing linguistics within Academia
 - ▶ Projects share sources openly:
 - ▶ lexica, grammatical rules, infrastructure
 - ▶ File sharing via version control systems
 - ▶ Open documentation pages
 - ▶ documentation via wikis, (you may contribute)
 - ▶ Academic computational linguists actually want their stuff to work on a realistic scale

Freedom of choice?

└ Language technology

└ A new paradigm for linguistic work

The screenshot shows the Apertium Main Page in a web browser. The browser's address bar displays the URL http://wiki.apertium.org/wiki/Main_Page. The page features a navigation menu with options like 'page', 'discussion', 'edit', 'history', 'move', and 'watch'. A banner at the top promotes the '2011 Google Summer of Code' and encourages users to check out ideas and translate. The main content area is titled 'Main Page' and includes links for 'Installation', 'Resources', 'Contact', 'Documentation', 'Development', and 'Tools'. A navigation sidebar on the left lists 'Main Page', 'Community portal', 'Current events', 'Recent changes', 'Random page', and 'Help'. Below this is a search box and a 'toolbox' with links for 'What links here', 'Related changes', 'Upload file', 'Special pages', 'Printable version', and 'Permanent link'. The central section, 'Translators', lists 27 stable language pairs such as Spanish ↔ Catalan, French ↔ Catalan, and English ↔ Spanish. It also mentions other pairs in development and provides links to the SVN repository and a list of language pairs. The bottom of the page is divided into 'Documentation' (with a link to the main article) and 'Miscellaneous' (with links to a list of dictionaries and translation quality statistics).

Apertium New Language Pair HOWTO

Apertium New Language Pair HOWTO

This HOWTO document will describe how to start a new language pair for the Apertium machine translation system from scratch.

It does not assume any knowledge of linguistics, or machine translation above the level of being able to distinguish nouns from verbs (and prepositions etc.)

Introduction [\[edit\]](#)

Apertium is, as you've probably realised by now, a machine translation system. Well, not quite, it's a machine translation platform. It provides an engine and toolbox that allow you to build your own machine translation

Contents [\[hide\]](#)

- 1 Introduction
- 2 You will need
- 3 What does a language pair consist of?
- 4 Language pair
- 5 A brief note on terms
- 6 Getting started
 - 6.1 Monolingual dictionaries
 - 6.2 Bilingual dictionary
 - 6.3 Transfer rules
- 7 Bring on the verbs
- 8 But what about personal pronouns?
- 9 So tell me about the record player (Multiwords)
- 10 Dealing with minor variation
 - 10.1 Analysis

└ A new paradigm for linguistic work

Status quo for Apertium

- ▶ 147 language pairs
- ▶ 93 languages
- ▶ 27 stable language pairs

Freedom of choice?

└ Language technology

└ A new paradigm for linguistic work

Challenges for Academia

- ▶ Open source: Share what you do (not only the article, but the ground material)
- ▶ Cooperation: Work in teams
 - ▶ Learn from programmers: track your work, document what you do
 - ▶ Compose teams with mixed backgrounds

Conclusion

- ▶ There is now a will, and a way, to provide languages with necessary infrastructure

Conclusion

- ▶ There is now a will, and a way, to provide languages with necessary infrastructure
- ▶ Better grammatical methods make our analysers robust, and interesting both for linguists and the language communities

Conclusion

- ▶ There is now a will, and a way, to provide languages with necessary infrastructure
- ▶ Better grammatical methods make our analysers robust, and interesting both for linguists and the language communities
- ▶ Without these resources in place, the freedom of choosing the language of your desire remains an illusion

Conclusion

- ▶ There is now a will, and a way, to provide languages with necessary infrastructure
- ▶ Better grammatical methods make our analysers robust, and interesting both for linguists and the language communities
- ▶ Without these resources in place, the freedom of choosing the language of your desire remains an illusion
- ▶ The message to sociolinguistics: Remember the material base for linguistic practice

Freedom of choice?

└ Conclusion

thank you!
